PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in IT support, software development, embedded systems, computer vision, and system integration. Experienced with Python, SQL, Flask, Raspberry Pi, ESP32, Arduino, networking, and machine learning through professional and academic projects.

EDUCATION

EULOGIO 'AMANG' RODRIGUEZ INSTITUTE OF SCIENCE AND TECHNOLOGY - MANILA

2022 - 2026

Bachelor of Science in Computer Engineering

TECHNOLOGICAL INSTITUTE OF THE PHILIPPINES

2021 - 2022

Computer Engineering - 1st Year

Transferred to *EARIST*

WORK EXPERIENCE

QUICKZLE MARKETING CORP.

July 2025 – September 2025

IT Intern

- Troubleshoot hardware, software, and network issues for end users to maintain daily IT operations.
- Developed and deployed internal Leave Management and Item Tracking systems to improve the organization and accessibility of company records.
- Configured and prepared workstations, installed software, and provided technical support under the IT Supervisor.

ACADEMIC PROJECTS

Capstone Project (PAWTECT)

2026

- Developed a Flask-based web application using Python, SQL, HTML, CSS, and JavaScript for dog registration, monitoring, and record management.
- Integrated Raspberry Pi and computer vision technologies for automated dog detection and identification.
- Implemented database-driven dog registration and tracking using SQLite and embedding-based image matching.
- Integrated wireless communication and automated owner notifications to support real-time detection alerts.

Smart Touch Mouse

2026

- Designed and developed a trackpad-enabled mouse using a Synaptics T1320A touchpad from a laptop, ESP32-C3 Mini, and Arduino Pro Micro to support touch & swipe gestures and wired/wireless HID operation. Implemented gesture processing and Bluetooth HID connectivity for multi-device switching.

Smart Reflective Safety Bag

2026

- Co-developed a dual-ESP32 wearable safety bag that uses ESP-NOW wireless protocol, MPU6050 deceleration sensing, and LDR light monitoring for automated brake, visibility, and BLE turn signals.

Barangay Population Census System

2025

- Developed a Python and SQL-based resident record management system with database storage, search, filtering, and CRUD functionality to digitize census records.

Automatic Air Cooling System

2025

- Developed an Arduino-based automatic cooling system using a DHT11 sensor to monitor temperature and humidity and calculate heat index. Implemented PWM fan control, automated humidifier activation, and LCD-based real-time monitoring.

CERTIFICATION

COMPUTER SYSTEM SERVICING - NATIONAL CERTIFICATE II

issued on 2024

GOOGLE TECHNICAL SUPPORT FUNDAMENTALS

issued on 2026

GOOGLE FOUNDATIONS OF CYBERSECURITY

issued on 2026

GOOGLE PLAY IT SAFE: MANAGE SECURITY RISKS

issued on 2026

GOOGLE BITS AND BYTES OF COMPUTER NETWORKING

issued on 2026

GOOGLE AI PROFESSIONAL

issued on 2026

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, HTML, CSS, C++

Frameworks: Flask

Databases: SQLite

Computer Vision / AI: YOLO, OpenCV, Machine Learning

Hardware / Embedded: Raspberry Pi, ESP32, Arduino, Embedded Systems

Networking: TCP/IP, DHCP, DNS, Network Configuration, Network Troubleshooting

IT Support: Windows, Active Directory, Hardware and Software Troubleshooting, Workstation Setup, Software Installation

Productivity: Microsoft 365 (Word, Excel, PowerPoint, OneDrive), Google Workspace (Docs, Sheets, Slides, Drive)

Design / Engineering: SolidWorks, AutoCAD, CNC, Microprocessors

ADDITIONAL

Soft skills: Willing to Learn, Critical Thinker, Problem Solver, Adaptability, Teamwork, Communication

Language: Filipino (Native), English (Professional)
