PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on IT support experience and a completed Google IT Support Professional Certificate. Skilled in hardware/software troubleshooting, workstation setup, basic network diagnostics, service-desk workflows, and technical documentation. Knowledge of Windows and Linux concepts, networking, system administration, IT security, and customer-focused support, complemented by programming and system-development academic project experience.

WORK EXPERIENCE

QUICKZLE MARKETING CORP. | IT Intern | *July 2025 - September 2025*

- Troubleshot hardware, software, and network issues for end users to support daily IT operations.
- Prepared and configured workstations, installed software, and provided technical support under the IT Supervisor.
- Developed and deployed internal Leave Management and Item Tracking systems to improve organization and access to company records.

PROJECTS

IT Support Simulations | ServiceDesk Simulator & SysDesks

- Practice ticket workflows, issue triage, troubleshooting documentation, and resolution steps through simulated support scenarios.
- Work through scenarios involving account access, network connectivity, workstation troubleshooting, and user onboarding/offboarding.

PAWTECT Capstone Project | 2026

- Developed a Flask-based application using Python, SQL, HTML, CSS, and JavaScript for dog registration, monitoring, and record management.
- Integrated Raspberry Pi and computer vision for automated detection and identification, database-driven tracking, wireless communication, and owner notifications.

Smart Touch Mouse | 2026

- Designed a trackpad-enabled mouse using a Synaptics touchpad, ESP32-C3, and Arduino Pro Micro, supporting touch/swipe gestures and wired/wireless HID operation.

Smart Reflective Safety Bag | 2026

- Co-developed an ESP32-based wearable safety bag with deceleration sensing, light monitoring, and wireless turn-signal functionality.

Barangay Population Census System | 2025

- Built a Python and SQL resident-record system with database storage, search, filtering, and CRUD functionality.

CERTIFICATIONS

Google IT Support Professional Certificate | 2026
Computer Systems Servicing - National Certificate II | 2024 - 2029
Google AI Professional Certificate | 2026
Google Foundations of Cybersecurity | 2026
ADB Institute Cybersecurity | 2026

EDUCATION

EULOGIO 'AMANG' RODRIGUEZ INSTITUTE OF SCIENCE AND TECHNOLOGY - MANILA | 2022 - 2026
Bachelor of Science in Computer Engineering

TECHNOLOGICAL INSTITUTE OF THE PHILIPPINES | 2021 - 2022
Computer Engineering - 1st Year | Transferred to EARIST

TECHNICAL SKILLS

IT Support & Service Desk: Hardware/software troubleshooting, workstation setup, software installation, ticket triage, issue documentation, user support, account-access troubleshooting, onboarding/offboarding concepts
Networking: TCP/IP, DHCP, DNS, network configuration and troubleshooting, connectivity diagnostics
Operating Systems & Administration: Windows, Linux fundamentals, command-line concepts, user/group permissions, system administration and IT infrastructure fundamentals
Security: Security risk awareness, access control concepts, incident identification/escalation, endpoint and account security fundamentals
Systems & Productivity: Active Directory, Microsoft 365 (Word, Excel, PowerPoint, OneDrive), Google Workspace (Docs, Sheets, Slides, Drive)
Programming & Databases: Python, SQL, JavaScript, HTML, CSS, C++, Flask, SQLite
Computer Vision / Embedded: YOLO, OpenCV, machine learning, Raspberry Pi, ESP32, Arduino
Design / Engineering: SolidWorks, AutoCAD, CNC fundamentals, microprocessors

ADDITIONAL

Soft Skills: Problem solving, critical thinking, adaptability, teamwork, communication, willingness to learn
Languages: Filipino (Native), English (Professional)
